Driver Registration

Ruptela

Supported by all Ruptela devices

See the full portfolio of Ruptela GPS trackers supporting Driver Registration.

**Note: Eco5 BM/Lite/Lite+ and Plug5 support only Bluetooth-type accessories.*

Supported Registration Sources

The functionality supports various registration sources, allowing flexibility in implementation:

1-Wire iButton:
Supports iButton ID variations. Videos are available that detail iButton Reader Connection and Configuration for Engine Blocking.

1-Wire RFID Card Reader:
Supports RFID card and magnetic card variations.

Wireless Accessories:
Configuration options include **BLE Beacon** configuration and Smartphone configuration.

Key Benefits & Control

This system offers robust control mechanisms by allowing the tracking device outputs to be configured for multiple security and informational functions:

Driver Monitoring:
Enables comprehensive monitoring and tracking of authorized IDs.

Vehicle Ignition Blocking:
Outputs can be used to block the vehicle ignition, ensuring only registered drivers can operate the vehicle:

- A specific **"Blocking with rest time"** registration mode has also been incorporated.

Real-time Registration Feedback:
Registration information can be provided instantly via outputs connected to an LED or buzzer.

Configuration

More information on the installation and configuration of the device can be found on Ruptela's documentation platform.
