Fuel Solution by Ruptela

Maximize fuel efficiency and reduce operational costs with Ruptela's advanced fuel monitoring solutions. Whether you need a plug-and-play FMS/OBD connection, EasyCAN to avoid interference in the vehicle's electronics, or a wireless fuel level sensor, Ruptela provides seamless fuel tracking tailored to your fleet's needs.

Three Ways to Take Control of Fuel:

I

HCV5 Lite + FMS/OBD Harness

Fuel data collection in 2 steps:

1. The FMS/OBD harness is plugged into the vehicle's interface.
2. HCV5 Lite device captures fuel-related data from the vehicle via the FMS/OBD standard.

Benefits:

- Easy installation
- Accurate fuel data
- Reduces installation and maintenance costs
- Real-time fuel monitoring

II

Smart5 + EasyCAN

Fuel data collection in 2 steps:

1. Connecting EasyCAN to the vehicle's CANbus wires.
2. Smart5 receives the extracted fuel-related CANbus data via EasyCAN.

Benefits:

- Contactless installation
- Accurate fuel data
- EasyCAN makes installation faster and safer
- Real-time fuel monitoring

III

Eco5 Family + Wireless Fuel Sensor

Fuel data collection in 2 steps:

1. Installing the wireless fuel sensor in the fuel tank.
2. Transmitting fuel data to the Eco5 device.

Benefits:

- Wireless installation
- Real-time fuel monitoring
- Theft prevention & alerts

Where efficiency meets vehicle data excellence at the best price!

Next-level quality in the telematics industry.

The Best of Ruptela:
Smart Solutions for Every Fleet

HCV5 Lite

Advanced device for versatile fleet solutions, balancing functionality and efficiency.

Main features:
- 2xInterfaces: CAN & OBD reading
- Trailer CAN reading
- CustomCAN
- RS232/RS485/K-line

Designed for:
- Heavy commercial vehicles
- Light commercial vehicles
- Trailers
- Machinery

Smart5

Compact device with CANbus data reading.

Main features:
- 1xInterface: CAN & OBD reading
- Trailer CAN reading
- CustomCAN
- Compact design

Designed for:
- Heavy commercial vehicles
- Light commercial vehicles
- Trailers
- Machinery

Eco5 Family

Designed to provide cost-effective and reliable basic tracking solutions for businesses of all sizes.

Main features:
- Slim design
- Premium GNNS-based vehicle tracker
- 4G+2G fallback
- BLE 5.0
- IP54 & IP68 housing rate

Includes 4 versions:
- Eco5
- Eco5 Lite
- Eco5 Lite+
- Eco5 BM
